

TSO CERTIFIED

# tailBeacon

Lowest-Cost ADS-B  
Installation for Your  
Certified Aircraft

**\$1999**

## skyBeacon

ADS-B Out, WAAS GPS,  
Baro Pressure Altimeter, LED  
Position and Anti-Collision  
Lighting

**\$1849**

## skySensor

ADS-B In, GPS, Baro Pressure  
Altimeter, LED Position and  
Anti-Collision Lighting - WiFi  
Traffic and Weather to your  
favorite EFB

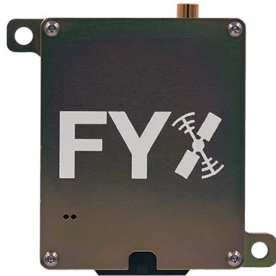

**\$750**

## skyLight

An aesthetic match to  
the skyBeacon - skyLight  
includes a LED Position and  
Anti-Collision Light

**\$500 - COMING SOON**

## skyFYX

2020 compliant WAAS  
GPS with remote  
mount antenna  
for echoUAT

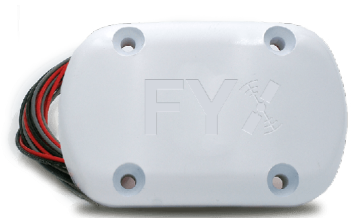

\$550

## echoUAT

Most affordable remotely  
mounted ADS-B transceiver  
- traffic and weather for  
your cockpit

\$999

## skyFYX-EXT

Easiest to install -  
All-in-One WAAS GPS  
receiver and antenna  
for echoUAT

\$500

## Our Mission

Since our formation in 2015, we've set our sights on bringing safety and intelligence to the skies in order to enable the integration of Unmanned Aircraft into our everyday lives. As our skies grow more crowded by the day, critical and affordable solutions are required by manned and unmanned aircraft alike.

We've taken it upon ourselves to aid in this integration of Unmanned Aircraft into the National Airspace by developing solutions that enable both unmanned drones and manned aircraft to cooperatively work together by sharing both their location and intent, enabling greater situational awareness and preventing potential in-air collisions. While the potential benefits of the drone economy are great, the challenges are also great. Our belief is that these challenges will not be solved by one industry or the other, and the needs of both manned and unmanned aircraft must be met simultaneously and affordably.

At uAvionix, we are pioneering the new airspace.
